Welcome to DialogLink - Version 5 Revolutionize the Way You Work!

New on Dialog

Order Patent and Trademark File Histories Through Dialog

Thomson File Histories are now available directly through *Dialog*. Combined with the comprehensive patent and trademark information on *Dialog*, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in the following patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need.

Thomson File Histories are available from the following *Dialog* databases:

- CLAIMS/Current Patent Legal Status (File 123)
- CLAIMS/U.S. Patents (File 340)
- Chinese Patent Abstracts in English (File 344)
- Derwent Patents Citation Index (File 342)
- Derwent World Patents Index (for users in Japan) (File 352)
- Derwent World Patents Index First View (File 331)
- Derwent World Patents Index (File 351)
- Derwent World Patents Index (File 350)
- Ei EnCompassPat (File 353)
- European Patents Fulltext (File 348)
- French Patents (File 371)
- German Patents Fulltext (File 324)
- IMS Patent Focus (File 447, 947)
- INPADOC/Family and Legal Status (File 345)
- JAPIO - Patent Abstracts of Japan (File 347)
- LitAlert (File 670)
- U.S. Patents Fulltext (1971-1975) (File 652)

- U.S. Patents Fulltext (1976-present) (File 654)
- WIPO/PCT Patents Fulltext (File 349)
- TRADEMARKSCAN - U.S. Federal (File 226)

DialogLink 5 Release Notes

New features available in the latest release of DialogLink 5 (August 2006)

- Ability to resize images for easier incorporation into DialogLink Reports
- New settings allow users to be prompted to save Dialog search sessions in the format of their choice (Microsoft Word, RTF, PDF, HTML, or TEXT)
- Ability to set up Dialog Alerts by Chemical Structures and the addition of Index Chemicus as a structure searchable database
- Support for connections to STN Germany and STN Japan services

*** ANNOUNCEMENTS ***

"Thomson File Histories" are now available directly through Dialog in selected patent and trademark files. Combined with the comprehensive patent and trademark information on Dialog, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in one of the patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need. See HELP FILEHIST for more information about how to use the link and a list of files that contain the link.

...that would authorize the prime minister to issue special directives in the event of an emergency. Articles of this nature are indispensable and are included in the constitutions of most other...

...society and threaten the dignity of individuals. We can attribute this, in part, to the absence in the Constitution of a clear definition of "public welfare" that would put freedom and...and effectively. Our proposed prerogative of the prime minister to declare a state of national emergency should be subject to ex post facto approval of the Diet. Article 88 (Prime Minister's declaration of a state of emergency and his command authority) (1) The Prime Minister shall proclaim a state of emergency for the entire nation, or part of it, as provided for by law, if an emergency takes place that encroaches upon or is feared to encroach upon the life, bodily safety...

...number of people, and the Prime Minister determines that the situation is so serious that emergency measures need to be implemented. (2) The declaration to be proclaimed under the preceding paragraph shall state the scope of affected areas and the overall conditions of an emergency that require such a declaration, as well as the date and time that the declaration shall take effect. (3) The Prime Minister may temporarily put police, fire defense and other security authorities under his direct control, in addition to...

...cancellation of a declaration) (1) In the event of proclamation of a state of national emergency, the Prime Minister shall present the Diet with the decision on the proclamation and obtain approval of the Diet

within twenty (20) days. If a state of national emergency is proclaimed while the House of Representatives is not in session, due to its dissolution...

...approval of the House of Councillors for the proclamation through convocation of that House in emergency session. (2) If the Diet does not approve the proclamation of a state of national emergency, or the proclamation is no longer deemed necessary, the Prime Minister shall promptly cancel the proclamation. Article 90 (Emergency measures by the Prime Minister and restriction on fundamental human rights) (1) In the event of a proclamation of a state of national emergency, the Prime Minister may implement emergency measures to impose restrictions on freedom from any physical bondage within the limits of the...

...if the Prime Minister implements the measures described in the preceding paragraph. (Notes) A national emergency could take the form of aggression by another country, a large-scale terrorist attack, a...
...that would be expected to lead to any of these events. Dealing with such an emergency will inevitably affect the ...what kind of action should be taken to cope with such a situation. In the absence of an article in the Constitution on a state of national emergency, the government and constitutional scholars have argued that a legal basis for legislation aimed at...

...on Japan because the government would have no choice but to deal with a national emergency from sheer necessity. However, current legislation that deals with such an attack is far from...

...with a military attack on the nation or to restore peace and order in an emergency, as well as the Basic Law on Natural Disasters, which lays down measures to be...

...place, Japan will be unable to take swift and determined action to deal with an emergency that could imperil the nation and its people. Because of the absence of a legal framework to deal with national crises, implementing makeshift "supralegal" measures to deal...

...situations could infringe on the fundamental human rights of the people To deal with an emergency, it is essential to take swift and resolute actions under an integrated chain of command...
...for empowering the prime minister to take direct command in the event of a national emergency. We propose this right of command on the assumption that legislative measures will be employed...

...minister to make flexible and rapid decisions and issue directives promptly to deal with an emergency, with the assistance of key members of the cabinet and other close aides. The prerogative given to the prime minister in an emergency should include the right to lay down necessary but minimal restrictions on the fundamental human...

...related to property rights. This would provide a clearly defined legal basis to such existing emergency measures as obliging people to

cooperate with authorities in rescue work in the event of a major disaster, and temporary limitation on the use by ordinary citizens of telephones and other means of communication, so...

...priority basis. The proposed right of the prime minister to declare a state of national emergency would be complemented by a provision requiring the prime minister to obtain approval of the...

...for his action within 20 days of the declaration. The proclamation of a state of emergency would be retracted if it was not approved by the Diet. (See Reference 3.) Specify...

Order Patent and Trademark File Histories Through Dialog

Thomson File Histories are now available directly through *Dialog*. Combined with the comprehensive patent and trademark information on *Dialog*, file histories give you the most complete view of a patent or trademark and its history in one place. When searching in the following patent and trademark databases, a link to an online order form is displayed in your search results, saving you time in obtaining the file histories you need.

Thomson File Histories are available from the following *Dialog* databases:

- CLAIMS/Current Patent Legal Status (File 123)
- CLAIMS/U.S. Patents (File 340)
- Chinese Patent Abstracts in English (File 344)

DialogLink 5 Release Notes

New features available in the latest release of DialogLink 5 (August 2006)

- Ability to resize images for easier incorporation into DialogLink Reports
- New settings allow users to be prompted to save Dialog search sessions in the format of their choice (Microsoft Word, RTF, PDF, HTML, or TEXT)
- Ability to set up Dialog Alerts by Chemical Structures and the addition of Index Chemicus as a structure searchable database
- Support for connections to STN Germany and STN Japan services

FCC Common Carrier Bureau gave Ameritech temporary approval to build and operate cable systems in Plymouth Twp., Mich. Ameritech's cable systems created controversy after Ameritech began building them last month without obtaining Sec. 214 authorization. RHC said it didn't need authorization and obtained franchises. In Aug. 11 notice proposing \$200,000 fine, Commission gave Bureau authority to issue temporary approval if Ameritech filed Sec. 214 application. Bureau action came same day that Ameritech filed such request. Meanwhile, company plans to appeal proposed fine. Spokesman for New Media Enterprises unit said company lawyers still were "reading everything" to determine course of action. He said Ameritech was "encouraged" by related proposal to streamline Sec. 214 application process, but it still was unclear whether that action would speed cable deployment. Streamlining proposal would apply to telephone companies that have obtained injunctions that bar FCC from enforcing telco-cable cross-ownership ban. Telcos need only certify that system isn't common carrier, that it will comply with rules to protect

telephone ratepayers, that it has obtained cable franchise. Spokesman said Ameritech is close to signing another franchise agreement with local govt., but declined to identify it. Negotiations are progressing with several communities in Ill., Mich., and Ohio, he said, with talks planned in "next few weeks" with communities in Ind. and Wis.

FCC should toughen slamming rules, 25 state attorneys gen. said in petition for reconsideration. They said stricter rules Commission adopted in June don't go far enough, and urged additional safeguards: (1) Slammers shouldn't receive any payment for unauthorized charges. Current FCC rules permit slammers to recover payment from customers but only at rate that customers' preferred long distance companies would charge. States suggested that local phone companies remove unauthorized charges from customers' phone bills and send bills back to slammers. (2) Promotional material, including checks, sent to prospective customers should be entirely separate from letters of authorization (LOAs). FCC rules require separation but permit some exceptions. For example, long distance company can offer check

to induce customer to change carriers and then can use that check as LOA if customer signs it. AT&T uses that promotional method, which wouldn't be permitted under states' proposal. (3) LOAs should be in same language as promotional materials. Kathleen Wallman, FCC Common Carrier Bureau chief, said she's "delighted" that states continue to be concerned about slamming. On issue of consumer liability, Wallman said: "We believed it was critical that consumers be made whole and that's what our new rules do." However, she said agency left open question whether rules should go further. She said rules permit use of checks as LOAs because "consumers seem to generally recognize these clearly identified checks as just that and to realize that if someone is sending you a check, they want something in return." In related action, MCI filed petition for reconsideration Aug. 11 saying FCC should eliminate LOAs in form of checks and shouldn't require full verification process when customers initiate change by calling interexchange carrier. Allnet suggested that Commission clarify confusing wording in slamming order, particularly references to interstate and intrastate presubscription. There aren't any places where customers can select intrastate versus interstate long distance companies, Allnet said, saying terms should be changed to intraLATA and interLATA.

Acquisition of wireless cable operator by Bell Atlantic and Nynex would violate MFJ restrictions, Atlantic Cable Coalition said in FCC filing. It said U.S. Dist. Court, D.C., conditioned March 15 waiver of MFJ restrictions on fact that waivers not be used for in-region wireless cable systems. Cable group also repeated claim that purchase of Atlantic Microsystems would violate telco-cable cross-ownership ban.

AT&T, MFS and Teleport Communications Group (TCG) urged FCC to act on petitions for reconsideration aimed at stopping Nynex from making access charge revisions in N.Y.C. area. Group said Nynex's new flexible access

charge plan "indirectly" would impose 69 cents surcharge on residential long distance customers in city and nearby suburbs. Figure represents increase in Nynex charges to connect residential customers' long distance calls. At same time that connection charges are raised, "Nynex, with 99.5% market share, was allowed to lower these fees for connections to certain business customers," statement said. "The FCC shouldn't let Nynex get away with virtually unlimited flexibility to reduce rates where it faces embryonic competition," MFS Senior Vp Andrew Lipman said. AT&T Vp Gerry Salemm said that unless plan is stopped "we would have little choice but to pass along Nynex's surcharge to customers in the New York City area." Otherwise, long distance customers throughout country would have to pick up tab, he said.

National Telephone Cooperative Assn. (NTCA) filed in support of request by Rural Ad Hoc PCS Consortium that FCC go ahead with Block C auction despite court stay of one auction rule. NTCA said it agrees with consortium that Commission "is free to implement its remaining rules" because 49% equity rule is only thing that was stayed by U.S. Appeals Court, D.C. Rescheduling auction would prevent "potential harm" to competition, NTCA said: "The stay of the Block C auctions is tantamount to giving Block A and B licenses incumbency rights in PCS."

CompTel filed opposition to BellSouth request for waiver so it can offer SMARTRing and SMARTPath special access services to switched transport customers with term and volume discounts. CompTel said problem isn't whether BellSouth can offer discounts but whether it can do so without meeting FCC's threshold criteria for volume and term discounts.

Responding to concern by Hewlett-Packard (HP), FCC Wireless Bureau froze applications for high-power 12.5-kHz offset channels in 450-470-MHz band until it can assure coordination with low-power equipment such as HP electrocardiograph monitors. Action was required as result of Commission's June 15 adoption of new regulatory plan for private land mobile radio spectrum below 800 MHz. Bureau said it agrees with HP that "a problem could develop if many applicants were to file for and obtain high-powered operation on these offsets prior to coordinators' identifying a new location for low -power operations."

FCC International Bureau okayed MCI request to increase foreign ownership of its capital stock to 35% from 28%. MCI sought approval because surveys show foreign ownership is rising above 28% even though British Telecom share hasn't changed. Agency said "the dominant U.S. presence on MCI's Board of Directors and in its management remains unchanged" and foreign investment will help MCI develop network and stimulate jobs.

FCC set Aug. 25 deadlines for comments on 2 telephone requests: (1) Pacific Bell petition for extension of waiver of Caller ID tariffing requirements because of conflict with Cal. state regulations. (2) Southwestern Bell's Comparably Efficient Interconnection plans for new

enhanced services including Internet access, PC backup & recovery service and fax service. Agency set Sept. 15 deadline on petition by Ontonagon County Telephone for one-year delay of requirement that it convert its switches to offer equal access. Company said otherwise it would have to convert 3 switches by Oct. 22 and another 3 year later, going through equal access balloting each time.

Northern Telecom obtained FCC approval to operate new Companion wireless communications system in portion of spectrum recently allocated for unlicensed PCS. New short-range system is designed for use where workers often are away from their desks but need to be accessible. It provides coverage for facilities of up to 4 million sq. ft. and several hundred users.

FCC granted license to Fair Oaks Cellular Partners for Rural Service Area (RSA) 549 in N.H., denying petitions for reconsideration filed by Optima Cellular Partnership and Schuylkill Mobile Fone. FCC in 1991 denied Fair Oaks' application for failure to provide "firm financial commitment letter." In 1992, Commission reinstated company as tentative selectee after deciding that requirement for firm financial commitment letter was unenforceable as result of Commission's failure to comply with Paperwork Reduction Act. Petitions argued that alternative grounds existed to dismiss application, but Commission disagreed.

FCC International Bureau granted AT&T applications to resell international voice services of various carriers and also to acquire facilities in Greece -France and Denmark-Sweden cable systems. Bureau turned down petition to deny filed by Telefonica Larga Distancia de Puerto Rico.

FCC denied Beehive Telephone's complaint that 800 Service Management System (SMS) isn't common carrier service and thus shouldn't be offered under tariff. Beehive had argued in alternative that if access to SMS is common carrier service, rates are unreasonable. Computer-based SMS service, operated by Bell Operating Companies, manages 800 number portability.

Pacific Telecom said it has FCC approval to acquire 49 exchanges from U S West -- 23 in Ore., 26 in Wash. Total includes 36,000 exchanges, many of them next to or near Pacific Telecom rural exchanges.

Granting motion by NCTA, New England Cable TV Assn. and other cable interests, FCC Common Carrier Bureau ordered Southern New England Telephone (SNET) to produce documents on its VDT trial in Conn. Bureau said SNET must produce its contract with Conn. Choice TV and any testimony that was presented to Conn. Dept. of Public Utility Control (CDPUC) involving that contract. Testimony was part of CDPUC review of SNET request to conduct VDT trial. Cable companies argued that Conn. Choice TV contract reflected SNET's involvement in prohibited cable operator functions such as selection, packaging, bundling and pricing of programming. Testimony on contract was subject to protective order in CDPUC proceeding and FCC said SNET can request confidential treatment of portions of requested information.

Teleport Communications Group (TCG) filed emergency petition with FCC Common Carrier Bureau Aug. 17 asking agency to force Southwestern Bell to provide TCG with central office code assignments in Houston and Dallas. TCG said that it needs codes to provide interstate switched access services and that Southwestern, in its role as numbering administrator, is "severely damaging" TCG by refusing to furnish numbering resources. TCG said it plans to use codes now for interstate services and later for its planned local exchange services. Company complained that, although TCG has federal authority to use numbers for interstate switched service, Southwestern has refused to provide them because TCG isn't yet authorized to provide local exchange service. Even after TCG becomes local exchange carrier, it will have to wait almost 4 months to use numbers because Southwestern "has established a very extended schedule for processing central office code assignment requests," company said.

New York Power Authority begins low cost power to Erie County.

NEW YORK POWER AUTHORITY BEGINS LOW COST POWER TO ERIE COUNTY

NEW YORK, Aug. 31 /PRNewswire/ -- The New York Power Authority will begin the sale of low-cost hydroelectric power to the Erie County Municipal Distribution Agency (MDA) Thursday, marking the first sales to an upstate MDA.

Power Authority Chairman Richard M. Flynn said 3,620 kilowatts (kw) of firm power will be provided to consumers in the New York State Electric & Gas Corp. (NYSEG) service territory of Erie County.

"This is a major milestone," said Flynn. "Since 1985, Governor Cuomo and I have consistently expressed our commitment to maintain upstate the hydropower always produced in and provided to that region. I'm just delighted that we're delivering power to Erie County's MDA."

Flynn said the sale to Erie County's MDA would fulfill the regional commitment and also permit the Power Authority to meet federal requirements on sale of quantities of hydropower to preference customers.

The power is among the cheapest in the country. It is part of a block of 134,000 kw that had been provided to NYSEG and the Niagara Mohawk Power Corp. for use by residential and farm consumers. Contracts for sales to the two utilities expired in 1985.

Most of that power, 123,000 kw, is temporarily assigned to downstate MDAs. The remaining 11,000 kw is sold to the two upstate utilities.

The distribution of firm power now being implemented maintains the regional status quo to which Flynn referred. It covers use of the firm

hydropower, which had been allocated to NYSEG and Niagara Mohawk.

In January 1985, the Power Authority announced the plan to provide 134,000 kw of preference power to MDAs in the service areas of the two upstate utilities. In June 1985, Power Authority trustees approved a proposal to temporarily assign the power to downstate MDAs until upstate MDAs were able to take the electricity.

Initially, 39,000 kw were sold to the Westchester County Public Utility Service Agency and then apportioned to MDAs in Rockland and Orange Counties, New York City, and Nassau and Suffolk Counties as delivery arrangements with local utilities were completed.

The amount of power has been increased annually to meet requirements of a 1985 U.S. Court of Appeals decision mandating more power sales to preference customers. A total allocation of 670,000 kw to public bodies is required for the one-year period which began July 1, 1988. Municipal electric systems and rural electric cooperatives receive 547,000 kw.

Under federal law, public bodies and cooperatives are preference customers for 50 percent of the Niagara Project's power. The Power Authority also has used power from the St. Lawrence-FDR Project to meet the preference requirement. A case concerning the MDAs' eligibility is before the Federal Energy Regulatory Commission.

On Sept. 15 an additional 1,000 kw will be withdrawn from the downstate MDAs and assigned to the St. Lawrence County MDA for industrial development.

It is anticipated that deliveries to MDAs in Niagara Mohawk's service territory will begin later this year, resulting in the rest of the hydropower block being withdrawn from the downstate MDAs. The Erie County MDA will receive additional hydropower at that time for customers in the county served by Niagara Mohawk.

Downstate MDAs will continue to receive interruptible energy from the Power Authority's Niagara Project near Niagara Falls in accordance with the 1985 plan. Interruptible energy is supplied around the clock when available, but can be curtailed on short notice.

New York City's MDA is challenging allocations of firm preference hydropower to upstate MDAs.

The state's municipal electric systems are challenging use of the hydropower by any MDAs -- upstate or downstate.

Agency set Sept. 15 deadline on petition by Ontonagon County Telephone for one-year delay of requirement that it convert its switches to offer equal access. Company said otherwise it would have to convert 3 switches by Oct. 22 and another 3 year later, going through equal access balloting each time.

Northern Telecom obtained FCC approval to operate new Companion wireless communications system in portion of spectrum recently allocated for unlicensed PCS. New short-range system is designed for use where

workers often are away from their desks but need to be accessible. It provides coverage for facilities of up to 4 million sq. ft. and several hundred users.

FCC granted license to Fair Oaks Cellular Partners for Rural Service Area (RSA) 549 in N.H., denying petitions for reconsideration filed by Optima Cellular Partnership and Schuylkill Mobile Fone. FCC in 1991 denied Fair Oaks' application for failure to provide "firm financial commitment letter." In 1992, Commission reinstated company as tentative selectee after deciding that requirement for firm financial commitment letter was unenforceable as result of Commission's failure to comply with Paperwork Reduction Act. Petitions argued that alternative grounds existed to dismiss application, but Commission disagreed.

FCC International Bureau granted AT&T applications to resell international voice services of various carriers and also to acquire facilities in Greece -France and Denmark-Sweden cable systems. Bureau turned down petition to deny filed by Telefonica Larga Distancia de Puerto Rico.

FCC denied Beehive Telephone's complaint that 800 Service Management System (SMS) isn't common carrier service and thus shouldn't be offered under tariff. Beehive had argued in alternative that if access to SMS is common carrier service, rates are unreasonable. Computer-based SMS service, operated by Bell Operating Companies, manages 800 number portability.

Pacific Telecom said it has FCC approval to acquire 49 exchanges from U S West -- 23 in Ore., 26 in Wash. Total includes 36,000 exchanges, many of them next to or near Pacific Telecom rural exchanges.

Granting motion by NCTA, New England Cable TV Assn. and other cable interests, FCC Common Carrier Bureau ordered Southern New England Telephone (SNET) to produce documents on its VDT trial in Conn. Bureau said SNET must produce its contract with Conn. Choice TV and any testimony that was presented to Conn. Dept. of Public Utility Control (CDPUC) involving that contract. Testimony was part of CDPUC review of SNET request to conduct VDT trial. Cable companies argued that Conn. Choice TV contract reflected SNET's involvement in prohibited cable operator functions such as selection, packaging, bundling and pricing of programming. Testimony on contract was subject to protective order in CDPUC proceeding and FCC said SNET can request confidential treatment of portions of requested information.

Teleport Communications Group (TCG) filed emergency petition with FCC Common Carrier Bureau Aug. 17 asking agency to force Southwestern Bell to provide TCG with central office code assignments in Houston and Dallas. TCG said that it needs codes to provide interstate switched access services and that Southwestern, in its role as numbering administrator, is "severely damaging" TCG by refusing to furnish numbering resources. TCG said it plans to use codes now for interstate services and later for its planned local exchange services. Company complained that, although TCG has federal authority to use numbers for interstate switched service, Southwestern has

refused to provide them because TCG isn't yet authorized to provide local exchange service. Even after TCG becomes local exchange carrier, it will have to wait almost 4 months to use numbers because Southwestern "has established a very extended schedule for processing central office code assignment requests," company said.

Outsourcing - a partnership in action

DIRECTIONS

March 01, 1999

Journal Code: WDIR Language: English Record Type: FULLTEXT

Word Count: 1208

Imagine a scenario where a large manufacturing company introduces a system of flexible staffing. It knows the benefits - reduced overheads, an immediate ability to increase or downsize staff strength and most importantly, freeing up company resources to focus on the core business competencies. The word goes out to the various HR departments, allegiances are built with a whole host of temporary-staff providers and within a minimal time frame, the company is being supported by multiple agencies. There is no central ownership, invoicing procedures are time consuming and cumbersome, and while the company can claim to have flexible staffing, it is seeing none of the benefits.

This was the situation presented by two of the speakers at the Manpower-Singapore Human Resources Institute combined conference on "Outsourcing and Flexible Staffing Solutions". Tom Pierson, director of staffing and workforce programmes of Hewlett Packard, shared with the participants a situation where the company was previously using up to 55 different temporary staffing agencies and coping with all the associated paperwork and administrative overheads. Today, this has been re-engineered to only two suppliers who fulfil all of the requirements for temporary, or contingent workers, that the company has across the United States. This same system is now being extended globally as Hewlett Packard reaps the

full benefits of outsourcing these temporary staffing needs.

We can compare the experiences of Compaq - Digital in Australia, which was struggling under the same process with regional HR departments all maintaining and building their own allegiances with a diverse range of temporary-staffing agencies. With no quality control system in place, decisions were arbitrary and no cohesive direction was applied in defining core competencies and which peripheral functions could be outsourced as a strategic process.

The experiences of both companies showed beyond question that this situation was intolerable - the companies had implemented a flexible, or contingent, labour force but received no benefits due to the demands of managing the system itself.

Robynne Sargent, acquisition consultant with DEC, discussed with participants the three-phase analysis that DEC undertook in order to establish a more equitable flexible workforce solution.

Phase 1 was the internal analysis of the company. This involved all

operational units and departments, recognising that everyone's support would be required in the longer term to effectively implement a new staffing policy. The initial survey was to:

- * review the temporary hiring procedures that were already in place;
- * identify those non-core functions that are already being outsourced;
- * discuss, at the highest levels within the company's management, the long-term goals for the organisation in order to determine what functions could be outsourced in the future.

Upon conclusion of the first stage, the company recognised two main factors: firstly, it needed to establish a close "partnership" style of doing business with a single provider, and secondly, it needed on-site management of the flexible workforce. In this context, the company was convinced it would be able to leverage a number of success factors including:

1. timely engagement of "best-qualified" candidates
2. reduced total costs
3. increased flexible staff utilisation
4. improved flexible staff performance
5. simplified procedures

These same objectives were outlined in Tom Pierson's presentation whose overview of the practice at Hewlett Packard saw the number of suppliers drop from 55 to only two after the confirmation of a Master Vendor agreement. His organisation, contending that a single supplier meeting such a large commitment, in this case up to 15 per cent of the total workforce, places too much vulnerability on the organisation itself, was satisfied with the relative safety of using two agencies. In both cases, DEC and Hewlett Packard, the results were the same: a quantum improvement in quality, productivity and significant cost savings for the company.

The establishment of a partnership requires a company to put into place Key Performance Indicators so that all parties have pre-determined and agreed criteria by which to evaluate the services being provided. Interestingly, the outsourcing process brings with it very quantifiable improvements in productivity and service levels and the reason for this is twofold.

Firstly, in outsourcing a function, an organisation needs to quantify the expected performance levels and to pre-determine the appropriate response for any number of different situations.

For example, in outsourcing the call centre function, an organisation needs to develop a standard pathway for any number of variable situations so that the "flexible" or temporary worker can respond as the organisation deems appropriate. Of course, this should be standard routine, but by pre-determining many criteria within the day-to-day operations, in order to support a flex-force system, a company takes a quantum leap in terms of efficiency.

A second major opportunity for increased efficiency is in defining skills required for each function, to enable the temporary-staffing agency to recruit the appropriate staff. Again, this is an area where historic growth has determined the job requirements by default and no one has actually quantified the skills, productivity and performance levels required. By outsourcing these temp services, the company has the benefit of professional screening processes which will include skills assessment

and training as well as on-site supervision of staff, which puts into place a second-tier check to ensure that skills which have been identified are indeed appropriate for the job in hand.

A Flexible Workforce Management Centre (FWMC) was one of the major criteria identified by DEC when putting together a call for a proposal document. >From the outset, DEC saw the need to have on-site management of the flexible workforce so that the criteria of training and skills assessment could not only be managed by the "partner" company, but also the ongoing re-assessment of skills and functions requirements. At the same time, DEC felt that one provider would not always be able to fulfil the job specifications within the time parameters, and in this context the FWMC would have the authority to liaise with other approved temporary staff providers on behalf of DEC.

This system has worked very successfully since it was first implemented and Robynne Sargent noted that after 12 months one of the DEC manufacturing units had shown efficiency gains and total cost reductions of approximately 50 per cent.

The advantages of building a partnership with a temporary staffing provider can be shown in very tangible terms of reduced cost and increased productivity. Hewlett Packard's Tom Pierson would not offer any figures to substantiate this. He views the major advantages of the flex-force or contingent workforce as the immediate increasing and downsizing capabilities. The company has none of the emotional baggage of firing personnel, expectations are established from the outset and the organisation benefits from the in-house exercise of defining and quantifying the skills and performance requirements of each job within the company.

Both organisations stressed the importance of the partnership style of business and after calling for proposals from a number of the leading agencies in the US and Australia, both these major multinational operations chose Manpower to be their partner.

* Based in Wisconsin, USA, with more than 2,500 offices in 48 countries, Manpower is the largest staffing and employment service in the world and last year employed some three million people. Manpower's Asia headquarters is based in Singapore. As regional director Christine Raynaud is responsible for Hong Kong, Malaysia, Thailand and Taiwan.
